

Nobody can tell you our story better than our clients.

So we asked 10 of them to tell you theirs.

We could have asked 4,000 of them but then this brochure isn't big enough.

Let them tell you...

Jaye Akintola

---

“The few lessons I have had with you so far have really helped me to exercise good money management skills, minimise my losses and fine tune my trading.

I recently used the reversal signal that you taught me and I gained £4.000 in 2 days by shorting the Dow futures.

I am truly grateful and I look forward to meeting you for more lessons.”

“Just a quick note to say how much I enjoyed yesterday's workshop with Sandy.

It has made me think quite differently about my strategy and given me confidence to start trading again.

Sandy's friendly manner and his ability to put across technical information in a clear, straight forward way made the time very worthwhile.

Thank you ”

“Everything you taught was of a very high value and contents which have never been explained in the manner you did were most informative, inspirational and educational.

The presentation was more than professional and highly descriptive. A standard others should adhere to.

Having paid others for highly priced seminars, I would gladly have paid you the money for the best trading seminar I have ever attended.

I am confident that I am now on my way to gain substantial profits in the financial markets.”

“Sandy,

I just made 79 points on a Dow short following your Fibonacci signals.

Absolutely brilliant. I should probably still be in the trade but I thought it best to get out before the weekend and while I could enjoy the feeling of being a winner for a change.

Thanks a lot. I think I may be on the way to getting my confidence back.

All the best.”

“Sandy,

I attended your session on 22-10-03 and was very pleased with the way you made everything so easy to understand

As I'm a novice at this, I feel that I have a mountain to climb but you made the ascent to the first plateau much easier.

Thank You”

“Hi Sandy, I attended your training workshop on Monday 20th October. I would like to say how much I enjoyed it. I am looking forward to putting your principles in to practice.

As a novice I have struggled to identify definitive buy signals, which I can now hopefully do with practice. Also your method of working a risk reward ratio and calculating stops will prove invaluable to me.

The training was very clear and the small number of attendees allowed you to spend time answering any of our questions.

Thank You”

“Hi Sandy,

I had a great time at the traders workshop and I just wish I had met you three years ago and I'd have saved a shed load of cash and probably be better off mentally for it.

Im taking your advice and going onc step at a time...”

“Thanks for a thoroughly eye opening course on Saturday - we haven't stopped thinking about all the things we learnt since.

Hans and I now have renewed enthusiasm for trading in the current market environment.

It was more than worth the trip to London from Belgium.

Thank You.”

“Hi Sandy.

Firstly, many thanks for a fantastic afternoon last Friday ...

As I said, I have been on the perimeters of Spread Betting, occasionally dipping my toe in the water for nearly 4 years with mixed results.

Your approach to the subject was truly helpful to me having things explained so simply and clearly with certain other things finally falling into place.

Many, many thanks for your 're-introduction' to this exciting business.”

“Just a brief note to say how useful the seminar was on Friday.

Sandy was so knowledgeable and passionate about the methods he uses. Above all he was friendly and approachable, making time for us all individually; sometimes-explaining things more than once when we need it, but in a very patient way.

I would recommend his course to anyone thinking of starting spread betting.

I certainly feel more confident now and am hoping to attend one of his full day courses soon.”
